Directions to SMUD's Customer Service Center

SMUD has two four-story buildings located adjacent to Highway 50 on the north side, between 59th Street exit and 65th Street exit. The Customer Service Center (CSC) is the newer building of the two located at 6301 S Street, and houses the Rubicon Room, Forestview 1,2, & 3, Sequoia 1,2,& 3, Timberline 1,2, & 3, and the HRL Conference Room located on the third floor (Northwest wing). The Headquarters building is located at 6201 S Street, directly west of the CSC. It houses the Headquarters' Customer Center (HCC), the Auditorium and several other conference rooms.

The Field Reporting Facility (aka FRF) is located behind the SMUD Headquarters building: go under the Light Rail overpass, then to the left about 150 yards.

Directions:

Heading East: From downtown Sacramento, head east on Highway 50, exit at **59th Street**. This exit will take you up-and-over Highway 50. Go straight at the first intersection, travel about a half mile. On your left (north) is the SMUD Headquarters building, the next building is the Customer Service Center.

Heading West: From Placerville, take Highway 50 to Sacramento and exit at **65th Street**. Go straight about one block after the first intersection. The Customer Service Center is the four-story building on your right (north).

You should be able to find parking spaces for visitors located in the area between the two buildings. There is also parking available in a parking lot on Folsom Blvd. behind the SMUD complex.

If you need assistance to find the Rubicon Room, Timberline 1,2,& 3, Sequoia 1,2,& 3, Forestview 1,2, & 3, and the Hydro Relicensing's Conference Room located on the third floor of the Northwest wing, see the guard at the lobby desk. The Headquarters Customer Center (HCC) room is located in the Headquarters building opposite the board of directors Auditorium in the first floor. Drive Safely.

Note: *Downloadable maps can be found at hydrorelicensing.smud.org/meetings/meet_loc.htm*

Subject: UARP - Water Balance Model Subcommittee - Meeting Cancellation

Dear WBMS members:

At the March 29, 2004 Water Balance Model Subcommittee meeting, we tentatively scheduled the next meeting for April 26.

We have decided to not hold this meeting. We have tentatively scheduled the next meeting for the fourth Monday in May, the 24th.

CHEOPS status:

We have essentially completed work on the CHEOPS software and have in fact completed run requests using it. Modeling issues presently outstanding are: (1) what specific whitewater boating releases from Chili Bar should go in the "base case," and (2) how Iowa Hill should be operated in the "base case with Iowa Hill" scenario. In the course of nailing down these two issues, only minor modifications to the program code are expected.

Model input report:

On the UARP Bulletin Board I posted a program input summary report which is a snapshot of the "Base Case" that we are finalizing. Please note that the summary posted there, labeled as "Base Case," is just a working draft of our tentative Base Case. The URL link at the bottom of this email message will take you to the Bulletin Board.

Thank you for your participation and please call or e-mail if you wish to discuss.

Dudley McFadden, PE
